1033 NORTH FOURTH STREET • MILWAUKEE 3, WISCONSIN

Always keep our NET PRICE LIST handy for use with this Catalog.

STATEMENT OF QUALITY	It is the policy of our Company to distribute merchandise of recognized high quality—made by manufacturers with a reputation for skill and integrity. If, therefore, any product purchased from us and used in accepted standard practices should prove to be defective in material or workmanship, it will be exchanged or replaced without cost.
TERMS	Indicate on your order whether you want it shipped by FREIGHT, EXPRESS, TRUCK or PARCEL POST. Our cash discount is 2% 10 days, 30 days NET, where accounts have been approved for credit. In the absence of satisfactory references, or previously approved credit, goods will be shipped C.O.D. Our responsibility ceases when goods are delivered in good order and receipted for, by the Carrier. All School orders will be shipped on open account if approved and authorized by the Superintendent, and if written on School Stationery.
RETURNS	Goods returned without our written permission will not be accepted. No claims for imperfection or short measure allowable unless made immediately on receipt and examination of goods, and before being cut. Returns of merchandise for any reason whatsoever must be made within 5 days for credit, and our INVOICE NUMBER must be given. These terms must be complied with to receive proper credit. Goods returned through errors other than ours will be credited, if in salable condition, at cost less 10% service charge.
PRICES	Because of existing conditions, prices in our NET PRICE LIST cannot be guaranteed and are SUBJECT TO CHANGE WITHOUT NOTICE. All orders will ,of course, be shipped at lowest possible prices. Although this Catalog has been prepared with great care, some errors may occur. The Company, however, will not be responsible for such errors.
BACK ORDERS	Should an item ordered be out of stock, it will be back-ordered and will be indicated by an (X) placed before the item on your packing slip. Although we always make it a point to have full and complete stocks on hand, back orders are cometimes unavoidable. In most cases, the items are on order and on the way to us from the factory, therefore will follow shortly.
NET PRICE LIST	Our NET WHOLESALE PRICE LIST must be referred to for prices of all items in this catalog. This list is compiled in order of Page Numbers as they appear in this catalog. New Net Price lists will be sent to you as changes or correction become necessary.
PARCEL POST SHIPMENTS	New regulations affecting the size and weight limit of packages became effective on January 1st, 1952. These regulations materially reduce the size and weight limit of parcels which can be shipped by mail. In some cases, therefore, we may have to ship by Express, truck or freight. Consult your Post Office for complete details.

All Prices Subject to Change Without Notice

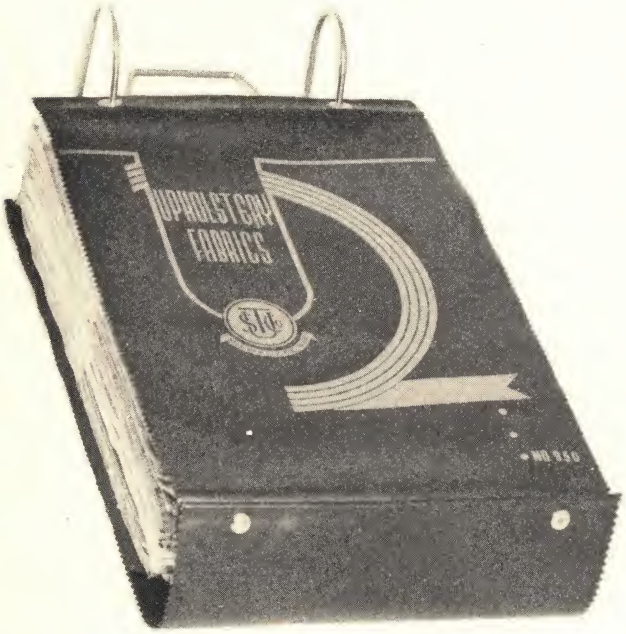
Because of uncertain conditions, no prices are given in this Catalog. Prices are quoted in our current NET PRICE LIST.

Upholstery Fabrics of Acknowledged Excellence! for Fine American Homes

An Outstanding Collection of

BROCATELLES • FRIEZES • TAPESTRY • VELOURS • BROCADES • MATELASSES
MOHAIRS • NOVELTY WEAVES • GENUINE LEATHERS and PLASTIC UPHOLSTERY

KEEP your account on our ACTIVE mailing list to receive our current NET PRICE LIST OF ALL ITEMS in this Catalog.



Your Most Valuable Asset

THE US SAMPLE BOOK OF

Fine Fabrics

This outstanding collection of Fine Upholstery Fabrics is offered to the Upholsterer and Decorator as a Special Service of our Fabric Department.

Nowhere, we are sure, will you find a more complete, attractive and desirable selection of fine Velvets, Brocatelles, Tapestries, Matelasse, Friezes, and Textured Fabrics than in this new, handsome, leatherbound Loose-Leaf Portfolio.

Designed for the easy addition of a new line or the removal of discontinued numbers, it is, indeed, the most practical and desirable system of sample presentation. It completely obviates the necessity for carrying loose, unsightly, soiled and frayed samples which are a costly, annoying and unproductive sales medium.

Choose the Line that affords you the greatest opportunity to exhibit your own skilled Craftsmanship.

Prove to yourself that better Fabrics can be sold with less effort and greater profit by showing the

US Line first.

US Fabrics. For greater Wear and Enduring Beauty!

A NET PRICE LIST for this Catalog is issued periodically. Keep your copy handy.

Individual Samples

The Standard Size

The beauty of weave and design in some of the samples shown in the loose-leaf portfolio of fabric samples is lost because of the limited size. To overcome this, progressive upholstery firms have supplemented this line with 1/8 yard individual samples. These measure 12″ long by 18″, are neatly bound and have a color line of swatches attached. To keep these samples in good order and in the best condition, we furnish, gratis, a metal holder and rings, which also is an aid to easier display.

The Realist -

The very best medium to attract and satisfy the critical customer. This large 3/8 yard sample, measuring 27″ by 27″ covers the back of the chair—or an entire cushion. A sample of this size gives your customer a preview of exactly how her new or re-upholstered furniture will look.

The cost of the 1/8 or 3/8 yard samples is very small when you consider the profitable result and the ease with which a sale is made. It will add greatly to your prestige by having these new and unusual samples on display.

Nationally Advertised in Full Page Color Ads in Leading Magazines

United States Rubber Company

Naugahyde

The Finest in Plastic Upholstery

Used by the Automotive Industry for Sport Models, Bus and Truck seats. Also by Leading Furniture Manufacturers

Universally accepted as the finest of the VINYL coated fabrics. NAUGAHYDE is used almost everywhere—and is equally at home in the swankiest cock-tail lounge or the seat in a locomotive cab. Its brilliant yet delicate, rich-toned colors never fade. Countless flexings won't make it peel. Dirt, perspiration—even spilled ink is easily washed away.

NAUGAHYDE isn't expensive either—in fact doesn't cost any more than many less desirable artificial leathers on the market, and you avoid all risk of costly complaints and replacements.

Use NAUGAHYDE and you use the finest.

- No special upholstering techniques
- Won't tear out at stitched seams
- Easily washed with soap and water
- Elastic Naugahyde easily and smoothly s-t-r-e-t-c-h-e-s around severe curves and difficult contours.

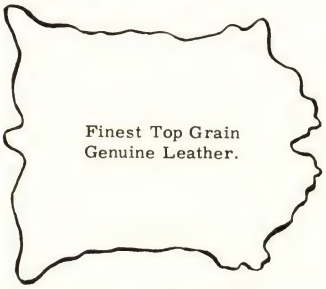
Always keep our NET PRICE LIST handy for use with this Catalog.

GENUINE LEATHER

For Truly Fine Upholstery There is No Substitute for Genuine Leather
Finest Top Grain—Half or Full Hides
Hides contain about 50 square feet.
We Do Not Cut Leather to Size

Standard colors carried in stock. Special colors from tannery in 10 days.

Samples available on request.



Per Square Foot in Half Hides.....$
Per Square Foot in Full Hides.....

Imperfections on the surface of Top Grain Leather (the hair side of the hide) such as scratches, briar marks, etc., are natural defects and are marks of distinction, so to speak. It is an indication that such leather is truly top grain and of the highest quality obtainable.

When figuring footage required, add about 33 1/3% for waste in cutting.

As a general rule 19 square feet of leather is required to cover as much as 1 yard of 54 in. material. This applies to leather in hides.

GENUINE LEATHER IN ROLLS

No Waste in Cutting as in Hides
Fine TOP GRAIN — 36 in. Wide

9 beautiful shades and grains.

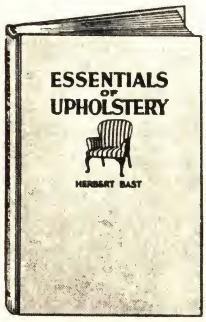
Cut lengths.	Per Square Foot $
25 yd. rolls.	Per Square Foot

Running yard contains 9 square feet.

Any length may be ordered—Full rolls contain 25 running yards.

Samples of these fine leathers will be sent on request.

TEXT BOOKS
Essentials of Upholstery



A splendid and well written Textbook by Herbert Bast, Instructor of Upholstery at Sheboygan Vocational Schools. For many years a practical upholsterer, Mr. Bast in his book explains in detail the different steps and methods used in modern upholstering. The book is full of illustrations and is very easy to follow. An excellent Manual Training Textbook.

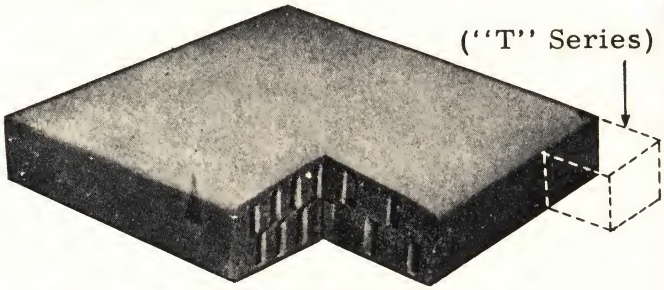
FULL MOLDED CUSHIONS

Complete, pre-formed units, with cored construction. Most widely used in this type are the Full Reversible Airfoam Cushions, which require only fabric covering and, in rare applications, slight trimming which is easily accomplished. Horizontal contour drawings and simple specifications of all stock Full Reversible Cushions are listed

A NET PRICE LIST for this Catalog is issued periodically. Keep your copy handy.

Airfoam Utility Inner Cushions



Used in place of conventional innerspring seat units, offer the luxurious depthy comfort of foam rubber, and cost approximately half as much as full reversible Airfoam cushions.

Available in standard sizes, Airfoam Inner Cushions are readily adaptable to most types of furniture. You can stock and process them like spring units . . . fill them by standard filling machine. No hand fabricating is required. Available in following sizes:

3⅝" box, 5⅛" Crown Series

Airfoam Cement

For Airfoam-to-Airfoam and Airfoam-to-tape adhesion. Furnished in quart, gallon, and five gallon containers.

Airfoam Binding Tape

For reinforcing or tacking. Comes in 100 yard rolls, in widths of 2", 3", 5", and 6". **One** inch of the width is adhesive-treated for easy application to Airfoam. **Full surface adhesive tape will be supplied only if requested.**

CHURCH KNEELERS
Use 1 Inch Firm Slab Utility Stock
Easily cut into 5½ or 6 inch widths

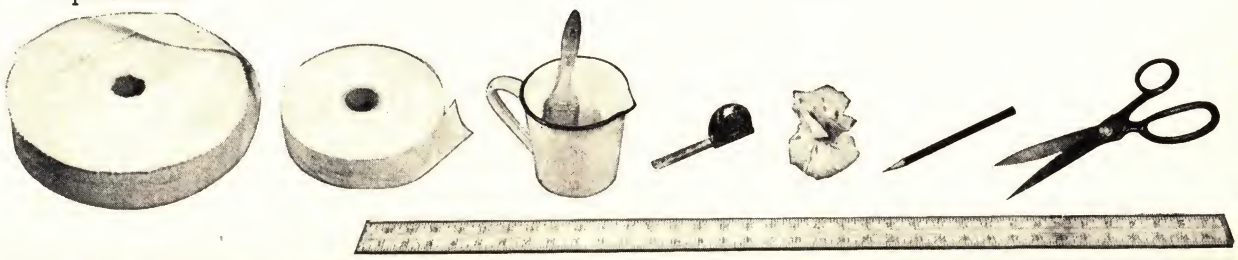
Airfoam Bar Stool Cushions

Airfoam Bar Stool Cushions are molded in two standard sizes taped to afford easy application, and require no additional fitting.

GOODYEAR MOLD NUMBER	SIZE
S-146	13" diameter, 3⅜" center thickness tapering to 3" at edges.
S-321	13" diameter, 2⅜" center thickness tapering to 2" at edges.

The use of Airfoam presents no problem in shop change-over, additional space, or the purchase of extra equipment. Your present shop setup will be adequate unless, of course, you are planning production expansion that will require changes.

To work with Airfoam, all you need are a pair of heavy scissors, tape measure, straight edge, marking pencil, Airfoam tape and cement, some soapstone, and a flat work table. If you're equipped with power tools, such as vertical and horizontal band saws and buffers, these will quite naturally speed up special fabricating work. Again, it depends upon the extent of your operations.



Stocked in Medium Density Only.
Firm Density from Factory.

PARATEX

Rubberized Curled Hair Pads

LOCHNER CUSHION FILLING MACHINES

Large Size 36x26 Box

The machine pictured here is the same foot-operated cushion filler that has become a country wide standard of value among the upholstering trade. However, to meet the two-cushion sofa problem, the depth of the box has been increased to 36 in. The new wide cushions are filled from the side, while all others from 13½ in. to 26 in. are filled from the end as usual. This one machine will now handle any and every standard filling problem.

Note to users: To get best results on smaller work, it is best to get the load fairly well centered on the pan supporting brackets. **DO NOT OIL THE PUSHER BAR.** Keep it clean and dry to insure good operation of the pressure lock. The pusher bar must move **ALL THE WAY FORWARD** and return **ALL THE WAY BACK** to alternately unlock and reset the lock. These instructions apply to all models.

NIP-CLIP
Reg. U. S. P. O.

1. By an invisible spring the blade is always kept open ready for the next cut. Does not cost more than good regular scissors.
2. Precision grinding of blades to insure uniform points and smooth action at all times.
3. Scientifically controlled temper.
4. New pebble nickel finish.
5. Perfectly designed to prevent tiring of hand from constant use.
6. Wherever scissors are used on a trimming operation the NIP-CLIP is the answer to faster, better work.
7. SLIGHT PRESSURE BETWEEN THUMB AND FINGER is all that is required for a clean, smooth cut.

● PROFESSIONAL QUALITY CUTLERY

COMPTON craftsmen have been skillfully manufacturing highest grade cutting tools since 1897. There is no compromise with quality in any stage of manufacture from forging to grinding and polishing. That is why every *COMPTON* product — from the heaviest metal snips to the most delicate embroidery scissors — bears that unmistakable imprint of quality.

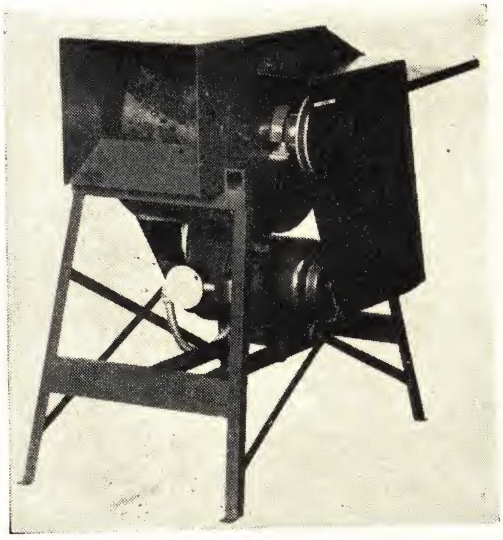
POWER-FED FIBER PICKER



MODEL PFC

A safe, efficient machine for combing and fluffing moss, tow, palm fiber, sisal, hair, and used cotton.

Twin-row ball bearing pillow blocks carry the all-steel picking cylinder, which is 14″ diam. x 12″ wide. 164 teeth are set in 16 rows, driven thru, and welded on the inside.

Feed is thru a pair of back-geared, all-steel, toothed rollers, which are powered from the motor by a combination V-belt and chain drive. The jackshaft is mounted on ball bearing pillow blocks.

The feed roller shafts and secondary V-belt idler run on impregnated type bronze sleeves; so all the bearings on this machine are of a type which require lubrication not oftener than once or twice a year.

The new improved housing is all-steel, featuring simplified construction, easy take-down, belt guards, and a feed aperture so designed that it is impossible for an adult hand to reach into the feed rollers.

The standard equipment motor is 1 hp., single phase cycle AC, 115-230 volt. It is **sealed ball bearing equipped** and **totally enclosed.** The heavy dust in which the machine operates cannot affect it. A motor starting switch is conveniently located, and the machine is ready to wire from a junction box into the electrical service.

FINISHING MATERIALS

STAINS

SHELLAC VARNISHES

REPAIR SPECIALTIES

Made By Specialists In Furniture Finishes

We handle only the best known and most widely used wood finishes. Time tested, proven results over a long period of years — plus careful analysis of new developments, assure easy to use finishes of lasting beauty.

STAINS

PIGMENT OIL STAINS

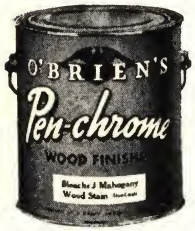
For uniforming unevenly colored woods, and for producing shaded effects, these stains are unequalled. Should be wiped off after applying to obtain depth of color desired. Very easy to use. Will not bleed through lacquer.

Colors:

Blond or Light Oak, Brown Mahogany, Medium Walnut, Dark Walnut, Jenny Lind Maple, Silver Gray.

Size cans .....Gallon Quart Pint
Each ..... $

PENCHROME STAINS



For modern "blonde" finishes on wood without bleaching. Need not be wiped. Won't fade or bleed. Will not raise the grain. Shellac may be used to seal.

Colors:

Platinum, Blonde, Driftwood, Maple, Bleached Mahogany, Graywood.

Size cans .....Gallon Quart Pint ½ Pint
Each ..... $

PENCHROME CLEAR FINISH

A clear satin waterproof finish ideal for use over Penchrome stains. Dries in four hours. For brush application.

Size Cans .....Gallon Quart Pint
Each .....

PENETRATING OIL STAINS

(STILLE-YOUNG)

For refinishing purposes and new work these stains are without equal. Depth and transparency of colors are remarkable. Shade can be made lighter by adding a small quantity of high grade benzine, naphtha, or turpentine.

Colors:

Light Oak, Cherry, Circassian Walnut, American Maple, Dark Brown Mahogany, Dark Golden Oak, Dark Red Mahogany, Dark Walnut, Early English Oak, Ex. Dark Red Mahogany.

Size ..... Gal. Qt. Pt. ½ Pt.
Each .....$

DRY STAINS

	¼ lb.	1 lb.
Water Soluble	$	
Oil or Lacquer Soluble.....		
Alcohol Soluble		

HOW TO MIX DRY STAINS

Lacquer and oil soluble stains are soluble in lacquer thinner, turpentine, Naphtha, etc. Add a very small amount of linseed oil for body and to prevent too rapid penetration. Add water stains to boiling hot water. Strain after cooling. Alcohol soluble stains should have a very small amount of shellac added after mixing to give the stain body.

No. 4 Quick Rubbing

A rubbing and polishing varnish. Not water-proof

Size .....Gallon Quart Pint
Each .....$

QUICK-DRY SUPER-KAMEX VARNISH

Campbell's quick-dry Super Kamex is a new and improved varnish that dries much quicker than ordinary varnish. Can be brushed when thinned with turpentine, but spraying is recommended. Dries within the hour. Waterproof, resistant to alcohol and alkali, and is recommended as a substitute for lacquer in quick finishing work. Has twice the solid content of lacquer, and is more economical to use.

ELECTRIC SPRAY EQUIPMENT

THIS LOW PRICED *Full Scale Outfit* WILL GIVE YOU PROFESSIONAL RESULTS ON OUTSIDE AND INSIDE JOBS!

"Sprayit" Series 270

Latest Streamlined Design!

Complete with 15-ft. hose, one-quart aluminum container, three nozzles (round, fan and angle), and latest type Sprayit internal mix (atomizing) spray gun. This gun is adjustable for volume and spray, and **very easily cleaned.** (¼ H.P. electric motor is available for this unit.)

For Homes, Farms, Shops, Stores, Offices, Schools, Apartments, Public Buildings

Never has so little money bought so much value in efficient, easy-to-use, dependable equipment for general home, farm, and business maintenance and redecorating. You will save time, paint and money from the day you get this all-around spray-painting outfit.

The Sprayit "Series 270" not only opens the door to the sensational new way to paint . . . you can also use it for dyes, insecticides, and to pump tires. The "270," operated by a diaphragm type compressor, delivers an amazing volume of oil-free air . . . **all you need** for home and general maintenance painting.

Paints 3 to 10 Times Faster than Brush Method With Any Kind of Paint, Varnish, Lacquer, Etc.

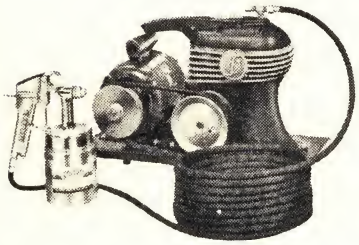
Dont confuse this **full-scale** equipment with "toy type" outfits. The Sprayit "Series 270" sprays actual paint, varnish, lacquer, etc. with **good coverage.** (Check this important point before buying any paint-spraying equipment!)

Sprayit "Series 270" never needs oiling . . . requires practically no attention . . . is always ready when needed. The three oversize ball bearings are lubricated and sealed for lifetime service. Weights only 39 lbs. **(with motor)** . . . is easy to carry, hook-up and use . . . quiet, cool and safe in operation.

Model 270—Complete, **without motor,** . . . . . Each $

SPRAYIT SERIES 460

1/3 H.P. Streamline Piston Type Compressor Units



Greater output for faster painting. Compressor bore 2¼ in. x 1 1/16 in. stroke. Displacement 4.25 C.F.M. with an actual air delivery of 2.68 C.F.M. at 40 lbs. pressure. Has ample capacity for spraying furniture, cars, etc.

The Sprayit DS Pressure Feed Spray Gun and Cup, with built-in oil and moisture filter, is regularly furnished with these units. The gun body and cover of this gun are made of die cast aluminum alloy, and the container is also aluminum, of one quart capacity. Round, fan, and angle spray nozzles are included with this gun—all nozzles and fluid tip being made of hardened steel.

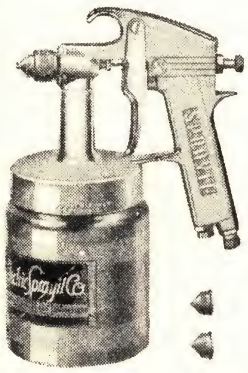
The Sprayit DS pressure feed Spray Gun with Type C nozzle and CKD Conversion Kit can also be furnished with the Series 460 Units at slight additional cost. This gun works to best advantage on fine finishing or refinishing work using lacquers, varnish, shellac, or other resinous materials.

Model 464-D—Complete Paint Spraying Unit, **without motor,** consisting of Sprayit Model 460 Compressor Unit Sprayit DS Gun and Cup, 25 ft. length 3/16 in. ID hose with ¼ in. connections, shipping wt. 47 lbs. . . . . Price $

Model 466-D—Complete Paint Spraying Unit, same as Model 464, but **with 1/3 H.P. 110 volt 60 cycle motor,** shipping wt. 76 lbs. . . . . Price

SPRAYIT MODEL DS SPRAY GUN

New Convertible Internal Mix Pressure Feed Spray Gun



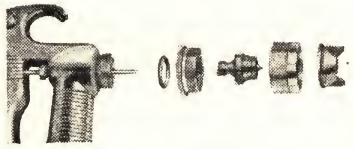
Another new addition to the Sprayit line! A sturdy, light weight, economical spray gun of the internal "break-up," pressure-feed "bleeder" type, capable of being converted to an external mix gun by a replaceable nozzle and tip assembly.

Model DS is a high quality gun, perfectly balanced and moderately priced with surprisingly small air consumption, making it an unanimous choice for use with small capacity portable compressors. Furnished with three spray nozzles—round, for touch-up work and spraying narrow or irregular surfaces; fan, for spraying flat surfaces such as walls, panels, etc.; angle, for spraying floors, ceiling, and under projecting surfaces. Gun has oil and moisture filter built in the handle guarding against contamination of spraying material. Also furnished with quart, aluminum, screw-on container, or may be used with pressure feed paint tank.

Model DS—Spray Gun complete with quart aluminum container and 3 nozzles, shipping wt. 3 lbs. . . . . Each $

Quart Containers . . . . . Each

Cup Gaskets . . . . . Each

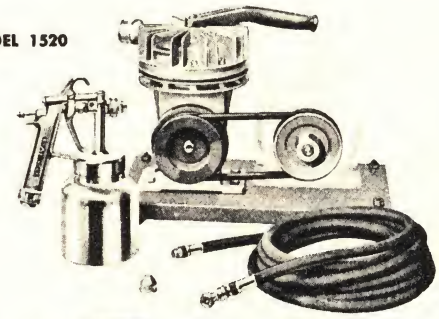


Sprayit conversion kit CKD provides a simplified means of converting a Model DS internal mix gun into an external type (paint and air mix outside nozzle) by the application of an interchangeable nozzle and tip assembly. Such conversion permits spraying fast drying materials with less cleaning of spray equipment and makes it unnecessary to change nozzles for varying spray patterns. A turn on the pattern adjusting ring makes a wide range of patterns possible from round dot to wide fan without stopping the gun.

Sprayit CKD External Mix Nozzle . . . . . Each $

ELECTRIC AIR COMPRESSORS

MODEL 1520



MODEL 1520 BELT DRIVE

For those who wish to furnish their own electric motor

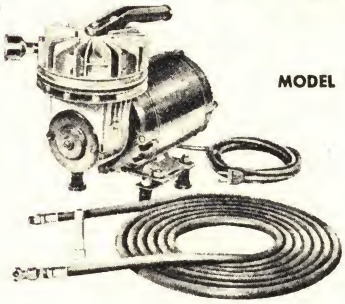
● This unique, packaged unit fits the requirements of those who already have an electric motor, ¼ H.P. or larger, and who desire all-around, efficient service from a portable air compressor without being called upon to purchase a new motor.

POWERFUL — 100 lbs. air pressure guaranteed.

COMPLETE, less motor — The Model 1520 unit is furnished complete with compressor, base, two 4-inch pulleys, V-belt, all hardware, necessary for mounting the electric motor, 15 feet of ¼" i.d. high pressure air hose with fittings, blow gun, tire chuck and paint spray gun. Dimensions: 17" long, 7½" wide, 12" high.

MOTOR SUPPLIED ON REQUEST

MODEL 1520-LA: Same as Model 1520, complete with base, pulleys, V-belt and mounting hardware, but less motor, air hose, blow gun, tire chuck and paint spray gun.



MODEL 110

MODEL 110 DIRECT DRIVE

Plug into any electric socket for Compressed Air Instantly!

● The perfect answer for tire inflation, lubrication, spray painting and air cleaning wherever a standard 115-230 volts AC, 60 cycle outlet is available.

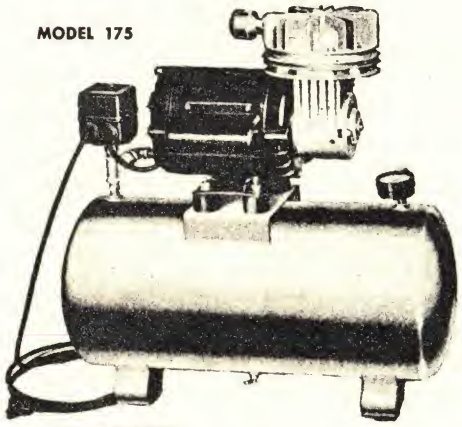
This handy, portable air compressor is giving faithful service daily, doing dozens of mechanical jobs in homes, on farms, in small machine shops, in repair garages and service stations.

All-Purpose compressor users also like the fact that no air tank is necessary, especially for paint spraying. This saves the extra cost and added weight of an air tank.

Furnished with handy carrying handle, 8 feet of heavily insulated electrical cable with standard bayonet plug. Complete unit with 115-230 volts AC, 60 cycle, ⅓ H.P. ball bearing, capacitor type electric motor, compressor, air filter, base, 15 feet of ¼" i.d. air hose, blow gun and tire chuck. Weighs only 42 pounds and measures 10x8x13" overall. Speed 1725 RPM.

MODEL 110-LA: Same as Model 110, complete with handle, cable, 115-230 Volts AC, 60 cycle, ⅓ H.P. ball bearing, capacitor type electric motor, base, but less air hose, blow gun and tire chuck.

MODEL 175



MODEL 175 DIRECT DRIVE

Tank Mounted

● The Model 175 is entirely portable, weighing only 75 pounds complete. It is compact, too, occupying far less space than other compressors of comparable capacity. Though portable, this very effective unit is a giant in output, equaling or bettering the performance of stationary tank-mounted equipment weighing up to 250 pounds.

Here is an Air Compressor that operates itself. Simply plug into the nearest electrical outlet and you are assured dependable and constant air pressure. Motor cuts in when tank pressure falls below 60 pounds and cuts out at 90 pounds.

This tank-mounted assembly is fitted admirably for any job requiring fast, all-round, efficient compressor performance. Complete unit with 115-230 volts A.C., 60-cycle, ⅓ H.P. ball bearing, capacitor type electric motor, compressor, tank, pressure switch, 15 feet of ¼" i.d. air hose, blow gun and tire chuck. Tank capacity — 5 gallons.

- **Compact** Only 23" long, 10" wide and 21" high.
- **Powerful** ⅓ H.P. motor develops guaranteed minimum tank pressure of 90 pounds.
- **Automatic** Motors cuts in at 60 pounds; cuts out at 90 pounds. Pressure switch adjustable.
- **Economical** Tank pressure is built up from zero to 90 pounds in 2½ minutes, and from 60 to 90 pounds in 1 minute, 30 seconds.

MODEL 175-LA for BELT DRIVE: Without motor and complete with compressor, base, tank, pressure switch, gauge, check valve, fittings, two 4-inch pulleys, V-belt, hardware for mounting motor, 15 feet of ¼" i.d. air hose with fittings, blow gun and tire chuck.

MOTOR SUPPLIED ON REQUEST

LePAGE'S

CASCOREZ POLYVINYL RESIN

A new kind of liquid glue that is as easy to use as household cements, just apply, press and let it dry.

It is as clean as library paste, white, non-staining, forms transparent film.

It is as strong as liquid glues, shows high shear strength on wood-to-wood joints and is as fast setting as hot glue; sets almost instantly on porous materials.

No. 12—Cascorez Pints.. Quarts... Gals.
1 pt. $ qt. $ gal. $

CASCAMITE

A urea-resin, dry powder, waterproof glue which is easily mixed with cold water. No heating or waiting necessary.

Makes complete waterproof joints that withstand soaking or exposure in any climate. Stainfree, will not stain acid woods like oak or mahogany.

Ideal for boats, and all interior or exterior use.

Each		
	100 lbs.	

CASEIN GLUE

CASCO GRADE A, WATERPROOF

An efficient and economical dry powder glue for builders, cabinet-makers, carpenters, boat builders, contractors, decorators, painters and householders.

An all glue dry powder containing no preservatives. It is mixed with cold water, making a quick-setting waterproof glue. Brown in color.

One pound of Casco makes 1½ quarts of liquid glue.

25-lb. Drums	Per lb. $
50-lb. Drums	Per lb. $
100-lb. Drums	Per lb. $

CASCO No. 2, WHITE

Stain Free

A dry powder which makes a white liquid glue which does not thicken — stays at full strength for three days. When set, bond is moisture resistant.

For stain-free gluing of joints and veneers of oak, mahogany and other woods of high acidity, veneering, inlaying, fine furniture gluing, etc. Especially suited for manual training work.

1-lb. Cans	Per lb. $
5-lb. Cans	Per lb. $
25-lb. Drums	Per lb. $
50-lb. Drums	Per lb. $
100-lb. Drums	Per lb. $

WATERPROOF GLUE

CASCOPHEN

A new, completely waterproof resorcinal resin glue which is ideal for boat-building, out-door furniture, sports equipment and oily woods.

Withstands almost any condition—continues outdoor exposure, cold or boiling water, moist or dry heat, mold or fungus, tropic heat or zero cold, solvents, acids or alkalis.

Bonds hard-to-glue joints and may be used on joints which are not perfectly fitted. Requires only moderate pressure and cures quickly at 70° F.

In twin container cans; liquid in one can, powder in other. Powder and liquid must be mixed or glue will not harden.

Size cans ..... 1 pt. qt. gal.

FRANKLIN LIQUID HIDE GLUE

No Heating Required
Ready to Use

Hide glue in liquid form allows the operator considerably more time to work before the glue sets. Tremendous strength and convenience in using makes this type of hide glue very popular. No waste. No risk.

CASCO FLEXIBLE CEMENT

Water-Resistant

Metal Wood Plastics Wallboard Glass Plaster Concrete Enamel	to	Wall Linoleum Sheet Rubber Fabric Leather Felt Canvas Paper Etc.

Casco Flexible Cement is made with **liquid rubber** which keeps the joint slightly flexible. Withstands jolts, handling, and the uneven expansions of different materials that break a "hard" joint.

The **Casco Flexible Cement** remaining on fingers or materials rubs off **easily** and **completely**—leaves hands clean. Does not stain or discolor.

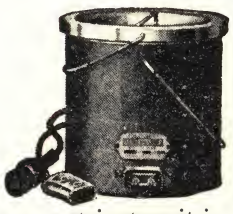
ELECTRIC GLUE POTS

HOLD-HEET POTS

Furnished for 110 A.C. Volts Unless Otherwise Specified



Thermostatically controlled to hold glue temperatures within 1°. There is nothing to regulate, no water jacket to boil dry. Put in the glue, add water for thinning and plug in. The glue pot does the rest. The thermostat measures out the current just as it is required to maintain accurate temperatures. The current is off much of the time. Holds temperatures at exactly 150° which is correct for hide glue.

Removable wiper rod. Removable heavy copper nickel plated chamber. No discolored glue. Element easily replaceable. Double asbestos heat insulation. Heavy rubber plug.

SANDPAPER

BEHR-MANNING BRAND

NEW PACKAGING

The old 24 sheet quire has been discontinued by the abrasive industry and all paper is now sold on a 100 SHEET BASIS. All paper is now packed in neat flat paper boxes, eliminating bent corners, soiled and damaged sheets, etc., and is much more satisfactory to handle and store. The 100 sheet method makes it easier to figure your cost per sheet also.

METHOD OF PRICING

For quantity buyers the STANDARD UNIT is the most economical way to purchase. A Standard Unit consists of 500 or 1000 sheet quantities depending upon the grit and kind of paper. The MINIMUM PACKAGE contains 50 or 100 sheets per box. Less than minimum packages means that we have to break boxes and this will increase your cost. Whenever possible, buy in Minimum Packages or Standard Unit quantities.

All Prices per 100 Sheets—Size 9x11 Inches

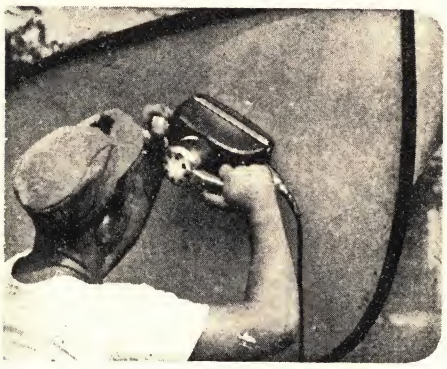
New DETROIT *Easy* FINISHER

No. 970
Sturdy steel case to carry the EASY, extra pads, abrasive paper, grease etc.

SANDS • RUBS • POLISHES • DEBURS

EASY FEATURES



Thousands of jobs for the EASY—finishing or refinishing wood, metal, plastic, slate, marble and other materials.

NO VIBRATION – A revolutionary new mechanism provides velvet smooth, fast, effortless operation. Finishes flat or *curved*, wet or dry surfaces 5 to 10 times faster.

PAD MOTION – Fast, straight-line action that duplicates the back-and-forth motion of hand block work. The only motion approved by craftsmen for most finishing applications. The action that does not sand cross grain; cut swirls, winkers, chains or other hard to cover abrasive patterns.

WEIGHT – It is a full size production sander of correct weight to insure durability, efficiency and ease of operation. It's not a hobby tool and is built to stand up on tough multi-shift production jobs.

HANDLE – A new streamlined rear handle provides comfortable one hand operation. An instantly attached (threaded) front handle is furnished with each machine for overhead work and other jobs where two hand operation is more comfortable.

DETACHABLE PADS – A simple slip-action method is provided for instantly attaching desired type sanding or rubbing pad of sponge rubber or felt.

MOTOR – The same type extra heavy duty electric motor is used that has powered EASYS for years. 115 and 220 volt models.

COOLING – Positive, dust filtered cooling is provided by locating air intake at top of the motor and use of a special designed fan. Correct location of air intake eliminates need of constantly cleaning or replacing filters and insures safety for wet sanding.

ABRASIVE HOLDER – A completely new, simple, easy to use holder permits attaching several sheets of abrasive (sand) paper at one loading. One third of regular 9" x 11" sheet of abrasive or standard 3⅔" x 9" cut sheets fit without waste.

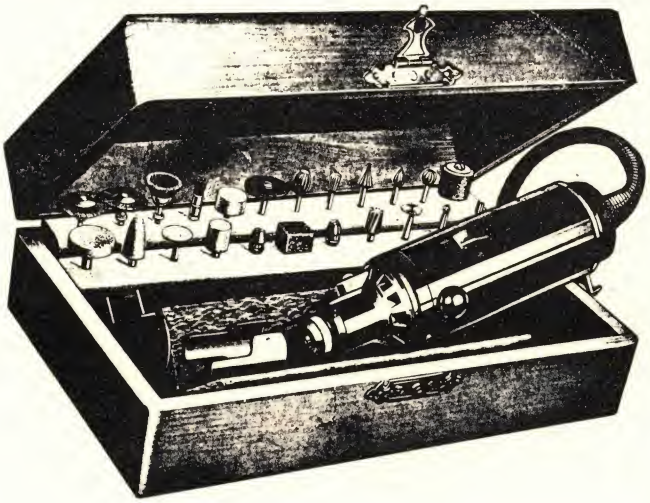
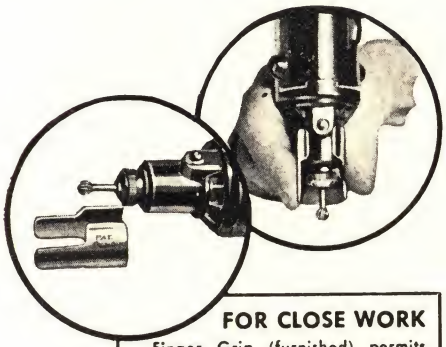
MOTO-TOOL KIT MODEL No. 2

THE "POCKET-SIZE MACHINE SHOP"





FOR CLOSE WORK
Finger Grip (furnished) permits operator to guide **Moto-Tool** with finger tips for fine detailed work.

Moto-Tool is a high grade tool in every respect. Cutters are all High Speed Steel.

Moto-Tool No. 2 is the ideal shop, laboratory or workbench tool. It is correctly balanced and weighs only 13 ounces. Designed to comfortably fit the hand, this practical machine uses all types of accessories, does precision work on almost any material. It delivers the right speed (approx. 27,000 rpm) for perfect performance of small wheels and cutters. Has plenty of power for fine, fast work. **Moto-Tool No. 2** plugs into any light socket, runs on 110 volt A.C. or D.C. current. Can also be had to run on other voltages, at no extra cost.

Every craftsman will be proud to own this attractive, modern tool kit that protects and safeguards his tools. Comprising **Model 2 Moto-Tool** and 24 Accessories, this beautiful kit has practical value for work at home, shop, school or profession. The quarter-inch thick hardwood box is highly finished and is ruggedly built for years of service. The interior is neatly lined with heavy felt and is practically arranged for **Moto-Tool** and Accessories. Craftsmen will appreciate the utility of this fine kit. It really meets the exacting requirements of the all-around craftsman.

KIT CONTAINS:

- One Model 2 Moto-Tool (with Chuck and ⅛" Collet)
- 2 Additional Collets — 1/16", 3/32"
- 1 Finger Grip Attachment
- 4 Emery Wheel Points
- 1 Dressing Stone
- 8 High-Speed Steel Carving Cutters
- 1 High-Speed Steel Saw
- 3 Bristle Brushes
- 1 Steel Brush
- 1 Screw Mandrel (with Sanding Discs)
- 1 Shoulder Mandrel
- 1 Drum Sander — ½"

2. USE WITH VENETIAN BLINDS!

The BADGER CRANE is the only crane that will install in back of a venetian blind box and project well beyond. This is the true answer to all venetian blind installations. Never is it necessary to install the bracket on plaster because the blind box covers all the casing.

THE DeLUXE BADGER CRANE

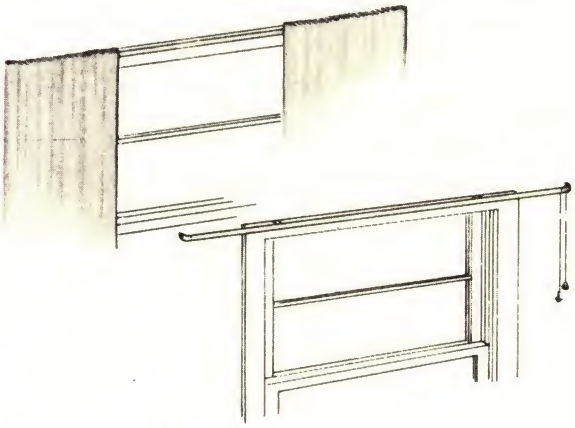
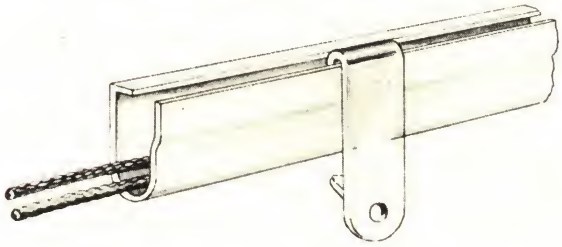
54 Cord	Dark Brown, Ecru, Light Linen, White		100 yds. on a spool 1000 yds. on a reel	2 lbs. 15½ lbs.	Hard, glazed, stretchless cord.

*Pat. applied for.

BADGER TRAVERSE RODS



BADGER TRAVERSE TRACK



This sturdy traverse track of modern design is made of rust-proof aluminum giving BADGER TRAVERSE RODS a lifetime of unfailing, smooth, quiet operation.

QUIETER, SMOOTHER, SLIDING ACTION

The slides on the BADGER TRAVERSE ROD are made of guaranteed, tested, high-strength clear plastic. They glide smoothly and quietly and will eliminate any metallic sound.

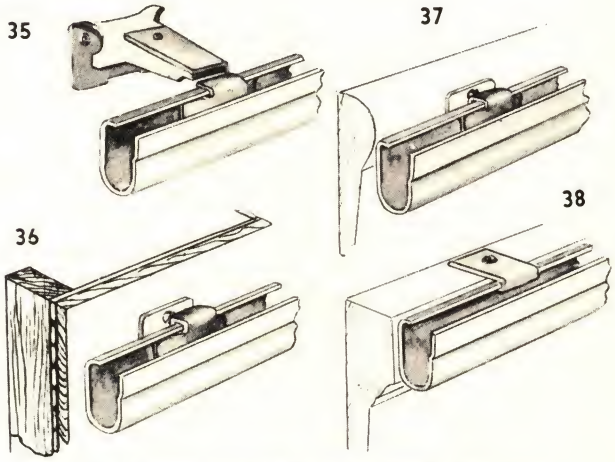
These slides may be used with any type drapery hook.

IDEAL FOR PICTURE WINDOWS

The BADGER TRAVERSE ROD is the ideal way to widen the appearance of a window. The rod extends over the wall area without fastening brackets on plaster.

The illustrations at the left show a small window that was made to look wider with a BADGER TRAVERSE ROD. This window will now admit the maximum of light and air when open or will close at the touch of a cord to bank the window with well-proportioned draperies.

EASIER AND MORE SELECTIVE INSTALLATIONS



All BADGER Brackets are installed as both end and center supports, and are concealed at the back of the rod. Visible center supports that mar the appearance of the face of the rod are obsolete!

Figure 37 shows how the BADGER TRAVERSE TRACK is fastened to round molding without "build-up" shims. The rod is held at the highest point of the window casing, eliminating the necessity for high drapery headings that soon droop.

Figure 38 shows a flush bracket installation on a window casing.

DETACHABLE

METAL BED CASTER SOCKETS

Packed Separately from Casters — One Set Per Box

These sockets are designed for use with any of the "Diamond-Dart" casters listed above. With these six popular sizes of sockets the necessity of carrying a large inventory of regular metal bed casters with springs attached is eliminated. Dealers can take care of 90% of customers' requirements and supply a high quality caster. Patented grip-ring construction holds caster stem securely in socket yet allows easy removal by hand.

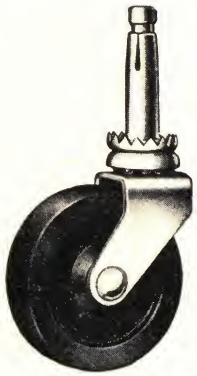
DESCRIPTION OF CASTER WHEELS

LIGNUM-VITAE—A hard, dense, tropical wood.
BACO—A semi-soft rubber tread moulded to a hard composition core.
ATLASITE—A phenolic-resin compound. Hard, durable, attractive.
UNIVERSAL—Hard rubber with fibrous filler.
FELTOID—Hard felt composition.

BALL BEARING

CRIB OR TEA WAGON CASTER



A very popular light duty caster for easy movement of cribs, bassinettes, tea wagons and similar light pieces of wood furniture. Ball bearing, standard grip-neck socket construction, with attractive black finish on metal and 2″ diameter molded solid tread composition wheel and 3″ diameter soft rubber tread wheel. Packed six sets per box.

STEEL GEM

ROLLER BEARING SWIVEL

Exceptionally strong, rugged plate casters designed for rough service and to carry heavy loads. Steel disc roller bearings give easy swiveling and the outer bearing retainer is open at the bottom so that the regular swiveling action forces out dust and dirt and prevents clogging. An excellent caster for garage creepers and small shop dollies. Packed one set per box. Bright steel finish.

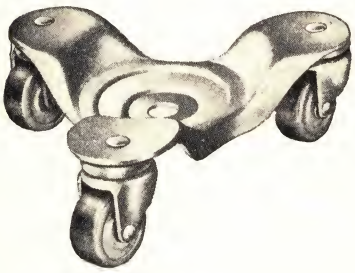
TRIANGULAR CASTER DOLLIES



No. 505 R.P.
Cut reduced size.

An all-steel stove truck or all-purpose caster dolly. Their low overall height allows them to slip easily under heavy boxes, packing cases, legs of heavy desks, tables, heavy furniture, radio cabinets, stoves and hundreds of other items, which do not require a permanent caster installation.

These inexpensive labor savers are equipped with Harvard ball bearing steel casters. The frame is heavy gauge steel and is practically indestructible.

Furnished with steel or Atlasite wheels in plain steel or cadmium rust-proof finish.

SPECIFICATIONS

Number	Wheel	Finish	Diam. of Wheel	Width of Wheel Tread	Diam. of Cup at Bottom	Overall Width	Overall Height	Per Set of 4

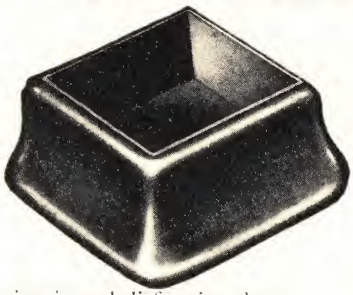
SQUARE NOMAR RUBBER SHOES



For Square Table and Desk Legs
"Glove-Fitting" Rubber Cushions

New shoes for square desk or table legs which offer the maximum of floor protection. The broad flat base spreads out the weight, and the resiliency of the high quality rubber prevents sharp edges of legs digging in and disfiguring floors.

Five sizes designed to fit ten sizes of desk legs. A necessity for the adequate protection of rugs, carpets and all types of linoleum, asphalt tile, rubber tile and other composition floor coverings.

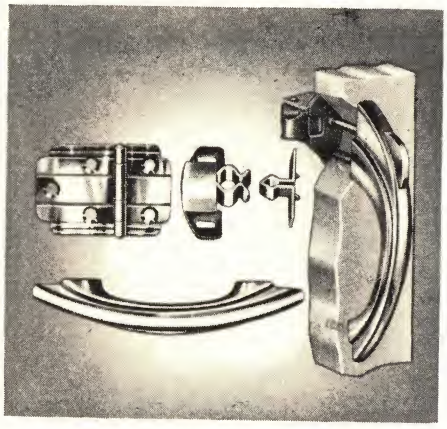
No. EO531 "Streamlux" Knob
Wrought Stainless Steel — 1¼" Diameter
Polished Chromium Finish — Black Lines
One dozen in a carton weigh 1¾ lbs.

Remember back when cabinet hardware was offered in only *one* type of hinge, *one* type of catch, *one* type of pull?

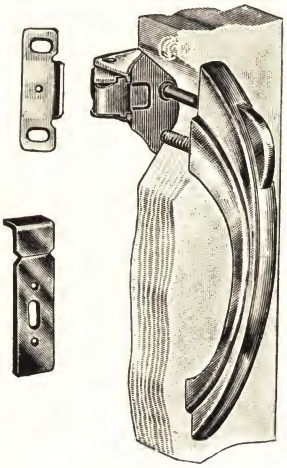
Customers choice was limited — your sales and profits were small.

It's not so long ago that dealers had very little to offer in Cabinet Hardware — Catches would stick — Hinges would sag. Hardware was purely functional, and very little thought was given to design.



But today Amerock offers beautiful "Matched" Designs. Positive, easy working catches with patented mechanism — both in Push Button and Friction Catches.

All items on this page also available in Bright Polished Solid Brass Lacquered



No. E9414 "Standard" Catch
(Patent No. D140,766)
(Canada Rd. 1945)

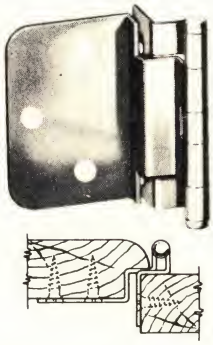
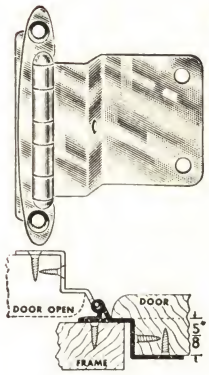
For Overlapping Doors ½" Inset. Frame Wing 2¾" x ½". Door Wing 1½" x 1". Raised Five Knuckle Joint permits full backswing of door.

One dozen pairs in a carton weigh 2¼ lbs.

N58-2390E 3/8" inset.
N58-2390M ½" inset
N58-2390L 5/8" inset.
Bright Chrome (CHR-4)



N58-598E 3/8" offset.
Complete concealed except for smoothly styled knuckle.
Steel—Bright Chrome (CHR-4)



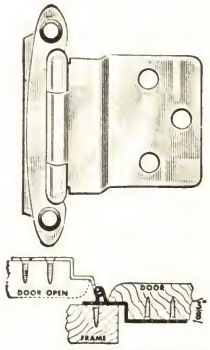
No. E7658
Steel — Polished
Chromium Plated

Semi-Concealed Hinge
(Patent No. D140,764)
(Canada Rd. 1945)
For Overlapping Doors 5/8" Inset. Frame Wing 2¾" x ½". Door Wing 1½" x 1 3/16". Raised Five Knuckle Joint permits full backswing of door.

No. E5988 Hinge
Steel — Polished Chromium Plated
For ¾" Flush Doors
Frame Wing 1½" x 7/8"
Door Wing 1½" x 7/8"
One dozen pairs in a carton weigh 2¼ lbs.

No. E550 Bread Board Knob
Steel — Polished Chromium Plated
5/8" Diameter
Fixed wood screw is an integral part of knob and cannot come loose at any time.
Three dozen in a carton weigh 1½ lbs.

No. E207 Bread Board Pull
Steel — Polished Chromium Plated
2⅜" Centers — 2¾" Overall
Three dozen in a carton weigh 1¼ lbs.



No. E7338 "Paintovr"
Semi-Concealed Hinge
Steel — Prime Coat Finish
(Patent No. D140,764)
(Canada Rd. 1945)
For Overlapping Doors 3/8" Inset. Frame Wing 2¾" x ½". Door Wing 1½" x 1 3/16". Improved raised joint construction (Patent Applied For) permits full backswing of doors and provides extra clearance for paint to prevent "rubbing off" or "chipping."

One dozen pairs in a carton weigh 2 lbs.

A63-3018N

Modern concave knobs in four sizes and five finishes. Finishes available are: Bright Brass, Dull Brass, Bright Chrome, Dull Chrome and Dull Bronze. Individually wrapped and packed one dozen in a carton with Washer Head screw for 1 3/8" wood.

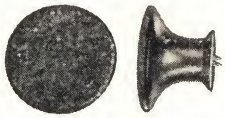
SOLID BRASS—
This is a fine line of Hardware, distinguished by its weight and painstaking workmanship. Beautifully hand finished.

COLONIAL CABINET HARDWARE

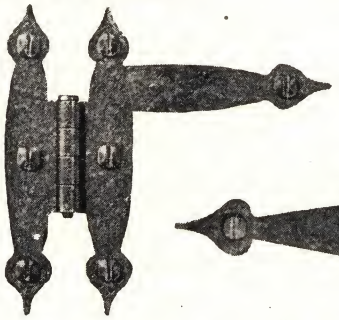
All items shown on this page are regularly supplied in Colonial Black—a highly rust resistant finish of beauty and durability.

No. E485 Door and Drawer Pull
3¼" Centers — 5 1/16" Overall
One dozen in a Carton weigh 1 lb.



No. E508 Knob
1¼" Diameter
One dozen in a Carton weigh 1½ lbs.

No. E1616 "H" Hinge
3½" Overall Height
1 13/32" Overall Width
For ⅜" offset.
Specify **No. 1620.**



No. E1618 "HL" Hinge
Reversible — For right hand or left hand doors
3½" Overall Height
3⅝" Overall Width
For ⅜" offset.
Specify **No. 1622.**

STRAP HINGES
No. E1600 — for Flush Doors — 6½" Overall Length.
No. E1605 — for ⅜" Offset Doors—6½" Overall Length.
One-half dozen pairs in a Carton weigh 2 lbs.

No. E9485—Catch
3½ in. centers, 5 1/16 in. over all.
One dozen in a carton.

Reversible—for right or left hand doors up to 1⅛ in. thick. Two strikes with each catch for flush or overlapping doors and undershelf application. Precision winged latch bolt mechanism (Patent No. 2,233,278) requires no lubrication for smooth, positive action. Ordinary swelling or shrinkage of doors will not affect catch adjustment.

Combines the beauty of authentic Colonial design with the smooth, quiet operation of modern precision mechanism.

SEMI-CONCEALED HINGES
Only small leaf of hinge shows when mounted on door
Sturdy five knuckle joint raised to allow full backswing of door

For Overlapping Doors
⅜" Inset or More
One dozen pairs in a Carton weigh 1½ lbs.

No. E1640 Hinge
For Flush Doors
One dozen pairs in a Carton weigh 1½ lbs.

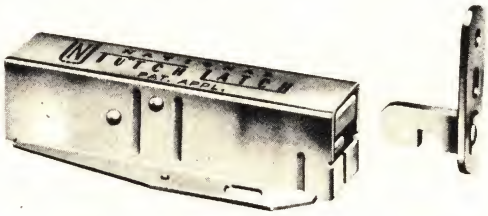
No. E1665 Hinge
For ¾" Flush Doors
One dozen pairs in a Carton weigh 2½ lbs.

SIMPLY TOUCH THE DOOR . . .

IT OPENS AUTOMATICALLY

NATIONAL TUTCH LATCH

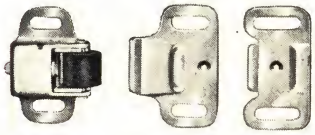
N61-380



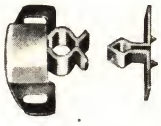
The National TUTCH-LATCH is designed for use on wood cabinets, and will assure years of smooth, easy, positive latching action. Mounting holes are elongated for easy application to cabinet wall or to top or bottom of cabinet shelf. Opens cabinet doors automatically with a gentle touch of finger, arm or elbow.

Packed complete with strike, necessary screws, escutcheon pins, and instruction sheet. 1 dozen in a carton; 12 dozen in a case weigh 28 pounds.

SPRING AND FRICTION CATCHES

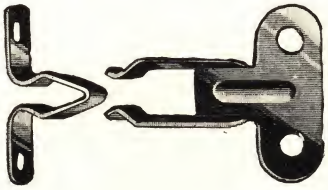


No. E9710 "Rubber Roller" Catch
Pat. Applied For
Bright Cadmium Plated
2 dozen in a Carton weigh 2½ lbs.
Cushioned by coiled spring action, it's quiet . . . as it rolls and retracts to open or close. Supplied with two strikes for flush or offset door and undershelf applications.



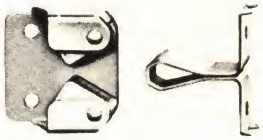
No. E9700 "Flexigrip" Catch
(Patent No. 2,376,325)
(Patented 1945 Canada)
Bright Cadmium Plated
2 dozen in a Carton weigh 1½ lbs.
Exclusive "floating" fingers with lifetime conical spring provide smooth yet positive action.

Illustration one-half size.



No. 139 CATCH
A good quality low-priced catch. Brass plated.

Per Doz. $ Per Gro. $



N61-3396 SPRING CATCH—A spring catch of unusual rigidity and strength. Strike has marker prongs to facilitate installation. Cadmium Plated (CAD-1). One dozen envelopes in a carton; 12 dozen in a case weigh 13 pounds.
Retail value: $ each; $ per dozen.

N61-336 CATCH (U. S. Pat. 2,244,-344). A quiet and flexible operating Catch with rubber rollers. Strike has marker prongs to facilitate installation. Cadmium Plated (CAD-1). One dozen envelopes in a carton; 12 dozen in a case weigh 15 pounds. Retail value: $ each; $ per dozen.

N61-3320 FRICTION CATCH—An inexpensive friction catch made of tempered spring steel. Cadmium Plated (CAD-1). Packed one dozen envelopes in a carton; 12 dozen in a carton weigh 10 pounds.
Retail value: $ each; $ per dozen.

N61-3348 ELBOW CATCH—Furnished Nickel Plated (NP-1). Catch is fastened on cupboard door and strike under shelf. Packed one dozen envelopes in a carton; 12 dozen in a case weigh 8 pounds.
Retail value: $ each; $ per dozen.

SERIES "410" NATIONAL LOCK*set*

PATENT APPLIED

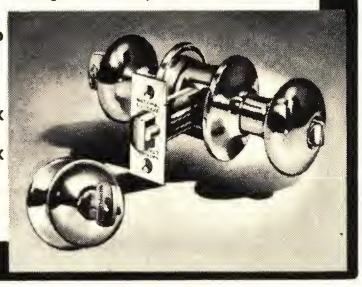
Outstanding addition to the extensive NATIONAL LOCK line of quality hardware is the Series "410" NATIONAL LOCKset. It's different . . . far different from so-called comparable items. Simplicity and dignity of design . . . lasting finishes accented and protected by baked phenolic lacquer . . . and fast installation are a few of many reasons why NATIONAL LOCKset offers *more* than any other lockset on the market. Compare the important differences, and you will immediately see why NATIONAL LOCKset is the best unit for you to sell. Write for catalog and complete information.

Nos. 411 and 411D KEY LOCK (exterior)

412 and 412D TURNBUTTON LOCK (porch, patio)

414 PRIVACY LOCK (bath, bedroom)

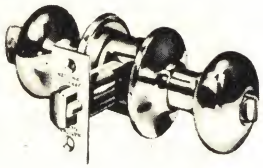
418 KNOB LATCH (interior passage)



NATIONAL LOCK*set* newest in design..

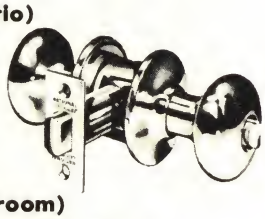
Series "410" provides a complete selection of precision-built locks for every door

No. 411D KEY LOCK (exterior)



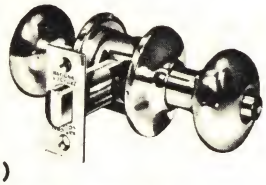
For exterior entrances to the home. Has 5-pin tumbler lock construction. Equipped with turnbutton, permitting free use of interior knob at all times while locking door against opening from outside. Dead latch prevents opening with knife or screwdriver. Added safety.

No. 412 TURNBUTTON LOCK (porch, patio)



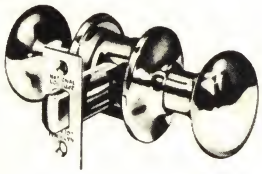
For French doors or other doors between interior of home and porch or patio. Turnbutton on inside locks door on opposite side. Once turnbutton is placed in locked position, door is always locked against outside entry. Yet exit can be made by simply turning knob.

No. 414 PRIVACY LOCK (bathroom, bedroom)



Designed especially for use on bathroom and bedroom doors. Pushbutton on inside knob provides complete privacy. Turning inside knob disengages locking mechanism. Simple release feature on outside knob permits emergency entrance by use of pencil, hairpin, etc.

No. 418 KNOB LATCH (interior passage)



Ideal for use on closet doors, storage room doors, all interior passage doors where locking is not desired. Has no locking mechanism. This high-quality latch positively holds door shut, yet permits easy passage into and out of room as desired. A high quality unit.

For Door Thicknesses from 1 3/8" to 1 3/4"

Available in Bright Lacquered Brass and Chrome, and in Chrome and Brass combination, ie., for bathroom doors. Locks are easy to install and full directions are given to change hand of lock, if required. Templates for installing packed with each lock.

NATIONAL LOCKsets are Faster to Install

ONLY 7 SIMPLE STEPS

1.
Mark hole centers with template. Drill for bolt and lock mechanism.

2.
Mortise for face plate and strike plate.

3.
Position lock and latch by slot-engagement.

4.
Fasten face plate with 2 wood screws.

5.
Put on clamp plate by turning to engage keyway. Tighten screws.

6.
Snap on escutcheon. Depress spring retainer and apply knob.

7.
Fasten strike plate with 2 wood screws.

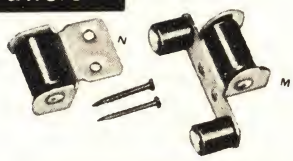
The World's Finest Roller Bearings for Wooden Drawers



Roll-eez Trade Mark DRAWER SLIDES

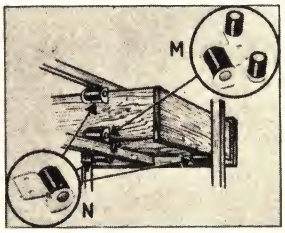
EASY TO APPLY—INEXPENSIVE PRACTICAL

One set for one drawer. Packed in envelope with nails and complete instructions.

Per dozen sets.....

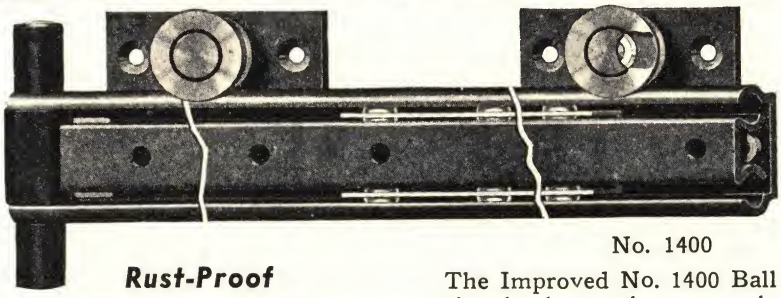
Per gross sets.....

Typical ROLL-EEZ Installation



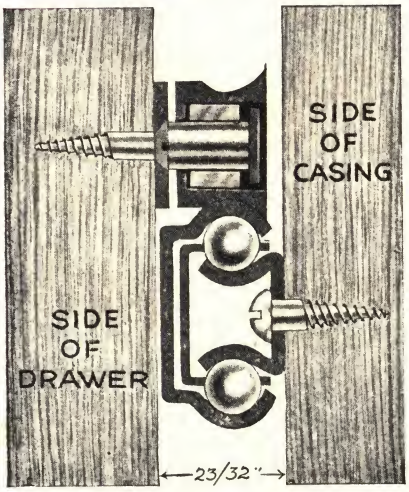
Two Roll-eez "N" are nailed to the bottom rail of the drawer opening. A third one is attached to the drawer back to run along the upper center runner. The Guide Roll-eez "M" is nailed to the bottom of the drawer on the back edge so that it straddles the lower center runner. Roll-eez not only provide a roller bearing action for the drawer, but also keep it in alignment.

NO. 1400 BALL BEARING EXTENSION DRAWER SLIDE



No. 1400

Rust-Proof Cadmium Plate



No. 1400—End View

End View of No. 1400 Drawer Slide Showing Actual Size

The Improved No. 1400 Ball Bearing Drawer Slide provides floating extension for heavy drawers and positively eliminates sticking, jamming, sag or breakdown, even when drawers are heavily loaded and fully extended. These features make it the finest slide on the market:

Frictionless—Heavy drawers slide easily on ball bearings.

Noiseless—All stopping points protected with rubber bumpers.

Removable—Drawers easily lifted out when fully extended.

Extension—Drawers pull out full length beyond the face of the cabinet.

Easily Installed—No mortising necessary.

Rigid Suspension—Drawers will not sag nor become dislodged when fully extended and heavily loaded.

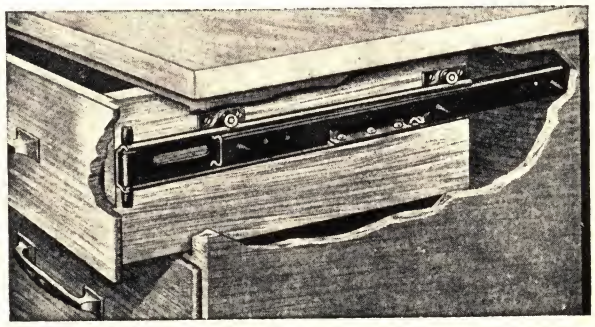
Bearings in Rollers—Genuine "Oilite" oil cushion bronze bearings are self-lubricating, frictionless.

Sizes in Inches—15, 16, 17, 18, 19, 20, 22, 23, 24, 25, 26, 28, 30, 32, 34, 36 and 38. Other sizes to order.

STOCK SIZES CARRIED

Size, inches	15	18	20	22	24	27	30
Per Set .....$							
Dozen sets, per set							

This slide is designed for use in connection with large heavy drawers which are required to operate easily and noiselessly under great weight. It is easily installed and always operates readily at the slightest pull of the finger regardless of the weight of the drawer and contents. It permits the opening of the drawer to its entire length. The drawer will not drop down and cannot be dislodged even when fully extended.



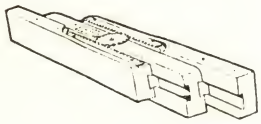
TO INSTALL

Drawer Size—$1\frac{7}{16}$"narrower, ¼" lower, ¼" shorter than drawer opening. No mortising necessary. These drawer slides can be used on drawers with casing slides 2¾" and lower by cutting off stops.

Drawer Slides—To determine proper size of drawer slide, measure from back end of drawer to back side of drawer front regardless of style of drawer. All slides are reversible and are equipped with rubber bumpers for noiseless opening and closing of drawer.

Application—Screw inner channel securely to side of case in approximate center. Pull slides all the way out. Place flange roller against back of bumper and fasten securely to drawer side. Place back roller parallel with front roller and ¼" from back end of drawer.

EXTENSION TABLE SLIDES



All slides are made of Hard Northern Wisconsin Birch.

18″ 10 Sections (5 Sections each slide) ..... Opens **42** inches
20″ 10 Sections (5 Sections each slide) ..... Opens **42** inches
30″ 6 Sections (3 Sections each slide) ..... Opens **26** inches

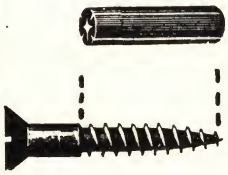
Less than 1,000 (Assorted) 25%

HOW TO ORDER

First column of specification chart at left shows screw sizes and length. Select the proper size Anchor from second column and specify required length from third column. Anchor should be as long as the **THREADED** part of the screw. See illustration below —

Great flexibility is offered since the Anchors can easily and quickly be cut to any required length with cutting pliers, knife or a saw.

• • •



Easy To Use

Drill hole to size specified for Anchor. (See Column Four) — **Do Not Use Oversize Drills.**

Drive Anchor into hole (no special tools needed — screw can be used to countersink the Anchor). **For best results, countersink the Anchor ⅛" below surface or as far as is necessary to house the screw.** Designed for snug fit — if Anchor does not fit hole snugly, use next larger size.

THE QUALITY MIRROR MOUNT
for fine furniture

MEN enthuse about "RIJID" Mirror Mount for two excellent reasons:
1. It's soundly engineered and strongly built of fine materials — sturdy cold-rolled steel and Alcoa Aluminum.
2. It saves them the time, trouble, and inconvenience of having to hang mirrors on walls — a job that has to be done over every time a chest or vanity is moved to a new location.

WOMEN love "RIJID" because it ends forever the nuisance of "unstraight" mirrors, walls and wallpaper marred and ruined by hang-up hooks and fade-marks.

With "RIJID", mirror-height can be easily adjusted without tools — a handy coin turns the two bottom set-screws, allows the mirror to be moved up or down to suit.

"RIJID" is the Mirror Mount that adds the crowning touch of modern convenience to fine furniture. Use "RIJID" on all your mirrored pieces.

In Blonde and Mahogany.

LINOLEUM PASTE

Our Linoleum Paste is unexcelled by any on the market. It is easy to spread and has immediate stick. Will not crack or draw when drying and will therefore eliminate much seam opening. Linoleum laid with Lino Paste lasts longer and stays in its natural position until worn out. Will remain in same consistency in zero weather or tropical climate.

Weight, approximately 12 lbs. per gal. Spreads approximately 12 to 14 sq. yds. per gal.

	5 Gal. Steel Drums	4 to case 1 Gal.	12 to case 1 Qt.	24 to case 1 Pt.

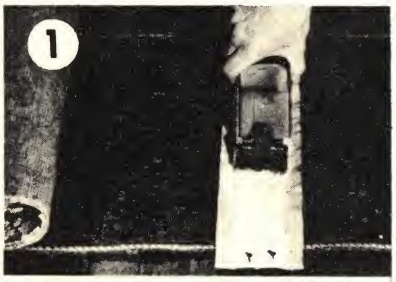
KWIK-GRIP

SEALS SEAMS FLAT AND FAST!

KWIK-GRIP APPLICATION

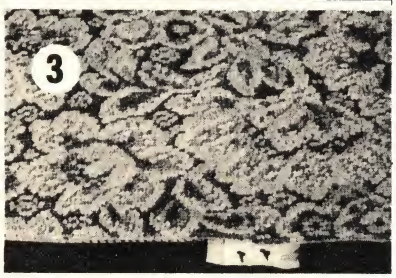
3 EASY STEPS

Place tape on padding directly below carpet seam. Spread on a coat of Rug Sealz.



Bring carpet edges together on center of Kwik Grip—using seaming tool and hand kicker. These tools are illustrated in Kwik Grip circular.

Result—A perfect invisible seam that will hold tight. Use same procedure when using Seam-Loc or Joinette Carpet Tapes.



CARPET SEAMING TAPE and TACKLESS ANCHORING STRIP

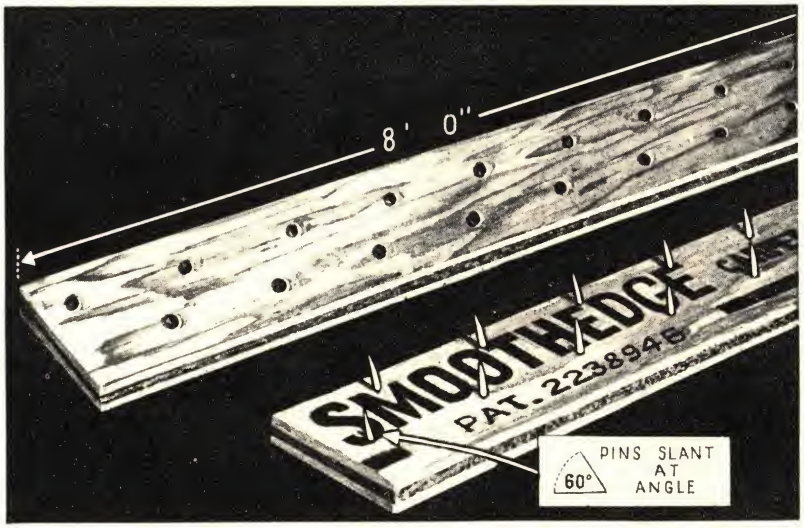
Face Seaming — On Location Seaming — No Stay Tacking Required — No Stretching Delay — Overcomes Pattern Mis-Matching — Seals Chemically and Mechanically — No Seam Breaking in Rugs.

25 yards to roll—8 rolls per carton.

Kwik-Grip easily applied with Rug Seal Latex Cement.

Special descriptive circular on Kwik-Grip available on request.

SMOOTHEDGE CARPET GRIPPER

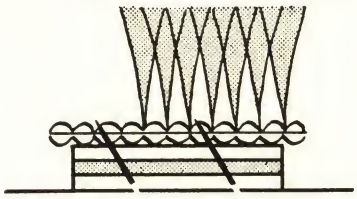


Smoothedge Carpet Gripper is made of strips of plywood—¼" thick, 8' long and 1⅛" wide. Especially designed, conical tipped 16-gauge steel pins penetrate the plywood at a 60° angle. These pins protrude just far enough to fully penetrate the warp of the carpet. They are staggered ½" apart in two rows; so the warp is gripped every ½" and along two wires.

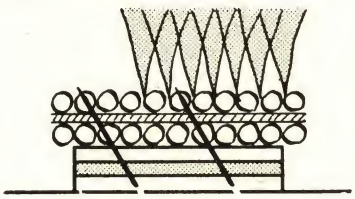
This combination provides strength, rigidity and gripping power to withstand the stretch given to the carpet.

WRITE FOR COMPLETE MECHANICS MANUAL

TWO TYPES OF SMOOTHEDGE CARPET GRIPPER



Type "D"—For Regular Carpet Warps: Regardless of the thickness of the carpet nap, most carpet warps are approximately the same thickness. For regular carpet warp, use Type "D".



Type "C"—For Chenille Carpet Warps: Chenille carpet warps are thicker than regular carpet warps. A longer pin is used in Type "C" Gripper, so the Chenille warp will be fully penetrated. For Chenille Carpet Warp, use Type "C".

Thickness of carpet warp rather than pile height determines the type of Smoothedge Carpet Gripper to use. Gripper Types "C" and "D" are designed so the pins will adequately penetrate the various carpet warps.

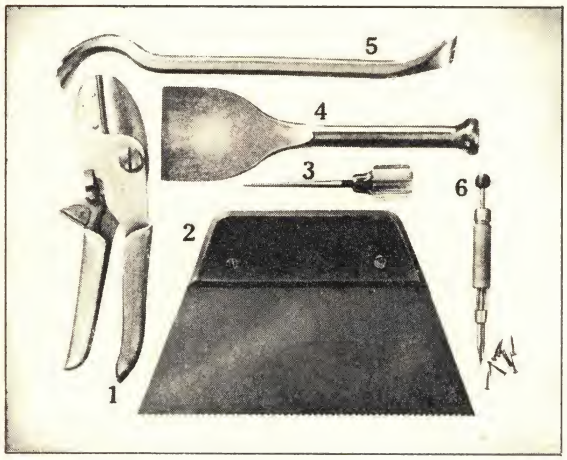
Special SMOOTHEDGE Introductory Order $60.75 NET

This special get-acquainted order offers you an immediate opportunity to test and judge the merits and advantages which result from using the patented Smoothedge Carpet Gripper. In a minimum of time and with minimum expense you can convince yourself that merchandising Smoothedge Installations pays double dividends.

THIS VALUABLE MINIMUM OFFER CONTAINS:

1. The complete Smoothedge Merchandising Plan (Contains four Units—for Management, Salesmen and Mechanics	**No Charge**
2. Set of Six Essential Tools for Smoothedge Installation	**$ 9.75**
3. 600 feet of Type D Smoothedge Carpet Gripper (Sufficient to install 250/300 yards of carpet)	**$51.00**
Total ONLY F.O.B. Our Warehouse	**$60.75** NET

THESE SIX ESSENTIAL TOOLS MAKE SMOOTHEDGE INSTALLATION EASIER AND FASTER!



1. **Wiss No. 908 Shear:** Makes cutting of the Smoothedge Gripper easy, fast and accurate—without waste or muss.
2. **Spreader:** To be used when the stretch is made with the Power Stretcher.
3. **Awl:** To easily penetrate and handle the carpet. Has a long, thin tapered point.
4. **Stair Tool:** Essential when installing stair carpet.
5. **Base Shoe Remover:** A tool especially designed to remove quarter round with a minimum of breakage.
6. **Ankorite Tool and Pins:** Invisibly anchors the carpet wherever it ends to flush doorways, hall runners, flush fireplaces, etc.

GRIPPEREDGE

Gripperedge is designed to work in conjunction with Smoothedge Carpet Gripper. Its purpose is to provide a smooth tackless finish at flush or nearly flush fire-place hearths, at bannisters around stair wells, across closet doors, around show windows, and other points where there is little or no foot traffic.

Advantages

1. Tackless-smooth tailored appearance with no exposed metal and no binding.
2. Made of durable .032 aluminum . . . easily handled.
3. Excess carpet maintained at turn-under.

In Boxes of 36,000 ..... Per Box

In sticks, for use in Red Devil Drivers shown below.

RED DEVIL AUTOMATIC DRIVERS

No. 1—(For No. 1 Diamond Points, 3/8 inch long) ..... Each $

No. 2—(For No. 2 Diamond Points, 1/2 inch long) ..... Each

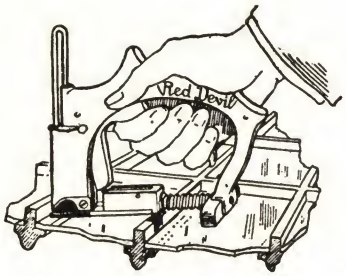
1 in a carton, with Extra Driving Plate.

Red Devil Automatic Drivers operate in any position—drive points when held at any angle. Points cannot drop out of the Magazine.

This gun allows one man to glaze more sash in an hour than five men by the old hand method with triangle points. **It also eliminates the use of brads and nails for picture framing and makes a smooth back picture in jiffy time.**

No. 1 point is the standard for use in glazing sash, No. 2 for reglazing old sash where the wood is soft. No. 2 point is the best for average picture framing except on very small picture frames where No. 1 will do.

Red Devil No. 2 Automatic Driver is the same as No. 1, except that it shoots No. 2 Diamond Points.



Patented.

GLASS CUTTERS

(Multiple Wheel)

No. 1

A turn of the screw loosens the set screw and a sharp wheel is instantly in place. Hardwood enameled handle, steel cutter head and frame.

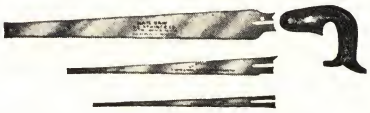
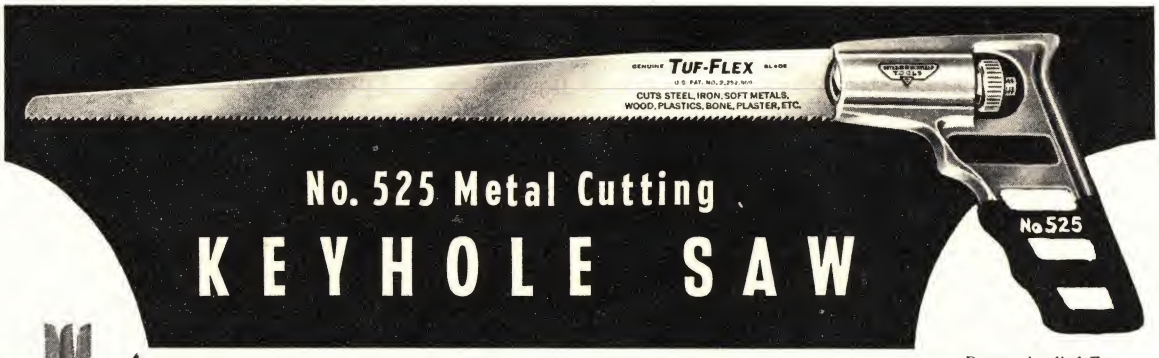
NEST OF SAWS—SILVER STEEL



No. 3 set has an adjustable handle which may be set at three different angles. Has compass, keyhole and metal cutting blade, which are interchangeable. The metal cutting blade will cut nails, pipe or any other metal without injury to the teeth.

No. 3 Set—Handle and three blades ...Each $



No. 525 Metal Cutting KEYHOLE SAW

Patent Applied For

CUTS MOST ANYTHING — MOST ANYWHERE

Steel, iron, wood, plaster, bone, plastics, nails, bolts, metal lath, asbestos shingles, non-ferrous metals, fibre board, hard rubber, etc., are all one to this remarkable new saw. It cuts them all. It does all the work a hack saw frame cannot reach and much more.

The blade can be faced and positively locked in eight different positions, allowing the operator to always have the handle in the clear for fast work without danger of skinned knuckles. The blade is held in a steel cylinder in the handle which can be revolved to any desired position by loosening the knurled thumb screw. Blades are easily interchangeable.

The handle is a casting with enough weight to facilitate metal cutting. It has a pleasing, sure and comfortable grip. The finish is glossy gray and red enamel. The blade holder and knurled thumb screw nut are nickel plated. Overall length 15½ inches.

No. 5256 DISPLAY UNIT

This clever display stand, ruggedly built of wood, finished and silk screened in three colors, as illustrated, presents the No. 525 Saw in a most effective manner. It is a silent salesman of the highest order and is positively free with an initial order for only six saws and three extra blades.

Base, 4¾" x 9⅜" — overall height with saws in place, 15½".

JORGENSEN CLAMPS

"HIGH SPEED"

STEEL "I"- BAR CLAMPS

STEEL bar clamps which are built upon "I"-section bars offer visible assurance of great strength and stiffness as sought by clamp users. The "JORGENSEN" Style No. 70 Steel "I"-bar Clamps are built upon the highest quality steel available in that particular shape. Style No. 70 "JORGENSEN" features the exclusive

"MULTIPLE DISC CLUTCH"

which permits instant adjustment to fit the work to make for the greatest possible speed in operation. The clutch-discs in the Tail-Stop automatically grip the bar at any point, leaving no final adjustment to be made by the screw. Will not slip under any clamping load, or from hammering the work, and is easily released by means of finger-grips extending from the clutch-discs. The clutch-discs will furnish long wear, and are easily reversed or replaced with new ones if this should ever become necessary.

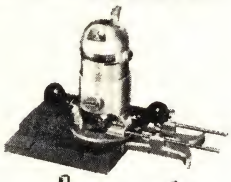
No. 040 ROUTER ⅜ H. P.

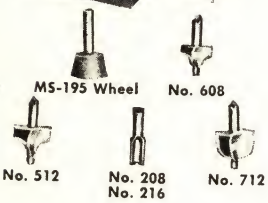
complete with gauge and 208 Bit

INCLUDES THE FOLLOWING STANDARD EQUIPMENT:
⅜ H.P. Motor Unit, 115 volts, use AC or DC current . . . Router Base . . . Chuck . . . Straight and Circular Guide . . . No. 208 Router Bit . . . Wrench.

The Stanley-Handyman Router can be used for grooving, making rabbet and dado joints, routing for inlays, templet work, decorative edges on tables and other furniture projects and woodworking operations. It operates at high speed from any light socket and produces smooth cuts with or against the grain. Can be used on wood or plastics. Depth of cut is regulated by simply raising or lowering motor unit in the base. Sealed type ball bearing motor operates at no load speed over 18,000 R.P.M.

No. 038 ROUTER KIT

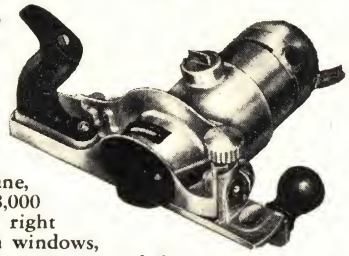




No. 038 KIT —
Consists of the following standard equipment: 040 Router complete, five router bits: Nos. 208, 216, 512, 608, 712, and MS-195 Grinding Wheel.

You can change the 040 Router to a Power Plane by the use of Adapter Kit No. GA-02 which includes plane attachment arbor and cutter.

No. 033 ELECTRIC PLANE ⅜ H. P.—



This power plane, operating at 18,000 R.P.M., is just right for fitting storm windows, door and window screens and for planing dressed lumber to correct dimensions for bookcases, shelves and other projects. Cutter furnished with plane leaves a smooth, waveless surface that needs little or no sanding. New design assures complete disposal of chips to prevent marring of finished surface. This is accomplished by a combination of motor air flow, design of cutter, and interior shape of plane to force chips to rear and downward away from cutter and operator.

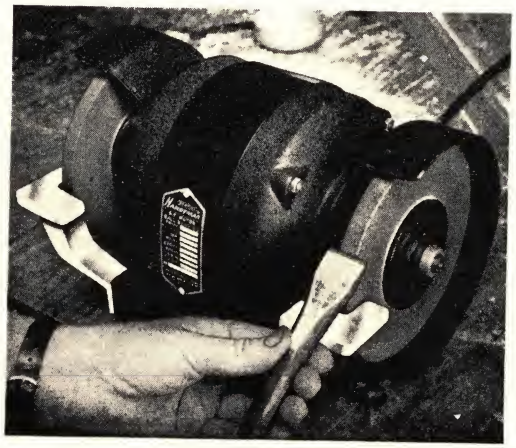
SPECIFICATIONS
MOTOR: Full ⅜ H.P., 115 volts, use on AC or DC current. **BEARINGS:** Sealed type ball bearings. **CUTTER SPEED:** 18,000 revolutions a minute. **LENGTH:** 10¾ inches. **NET WEIGHT:** 7½ lbs. **SHIPPING WEIGHT:** 9 lbs.

Plane Cutter, 1-13/16" long (No. 4158S) .....

You can change the 033 Power Plane to the 038 Router by the use of Adapter Kit No. GA-66 which includes Router Base, Chuck, Guide, 5 Router Bits and Grinding Wheel .....

No. 56H BENCH GRINDER ¼ H. P.



SPECIAL FEATURES

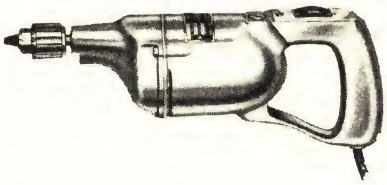
- Motor—¼ H.P., constant speed induction (not universal) for continuous operation on AC current.
- Full ball bearing — bearings enclosed against dirt and grit.

- Safe, wide wheel guards, adjustable tool rests. Guards permit use of wire wheel brushes and can be drilled and tapped for mounting of Stanley Safety Eye Shields No. 569 (order as extra equipment). Guards are adjustable to permit grinding at any point on wheel circumference.
- Switch — Toggle type enclosed in moulded case — conveniently located on front of Grinder.
- Furnished complete with three-wire rubber covered cable; rubber feet; grinding wheels 6" x ½" (one coarse and one fine); wheel guards and tool rests.

SPECIFICATIONS
VOLTAGE: AC single phase, 110 volts, 50-60 cycles. **SPEED R.P.M.:** 3450—60 cycles; 2850—50 cycles. **WHEEL:** 6" x ½". **ARBOR HOLE:** ½ inch. **LENGTH:** 12 inches. **BASE:** 6 x 6½ inches. **NET WEIGHT:** 34 lbs. **SHIPPING WEIGHT:** 38 lbs. Can be furnished AC 230 volts, 50-60 cycles .....

Smooth running ¼ H.P. ball bearing Grinder for sharpening tools, buffing, polishing and wirebrush work. Compact in size, it takes little space on the work bench. It is ideally suited for the home workshop, garage, on the farm, or any shop.

MILLERS FALLS ELECTRIC DRILL



No. 314

¼ Inch Electric Drill

Easily Converted into a handy Economical Drill Press

Beautifully designed and engineered to a high standard, not a low price. Light in weight, excellent balance and comfortable grip. Powerfully motored and sturdily built throughout to guarantee smooth, uninterrupted performance. Capacity ¼″ steel. Length overall 12″. Weight 4½ lbs.

Motor—Universal for DC or AC, 25 to 60 cycles.
Voltages—110, 125, 150, 220 or 250.
Speed—No load 1800 RPM.
Chuck—Jacobs Key. **Gears:** Heat treated alloy steel.
Bearings—Ball thrust spindle bearing
Switch—Fully enclosed
Cord and Plug—7 feet

No. 314—Drill .....$

WOOD BITS

For ¼ Inch Electric Drills

5 Popular Sizes with ¼ Inch Shank.

No. 1314 STAND

No. 1314 Drill clamps into this stand quickly and easily making a sturdy, serviceable bench drill. Maximum feed 2½″ — column to center of chuck 5″. Weight 25 lbs.

No. 1314—Stand .....$

No. 2120 ANGLE BUFFING AND SANDING ATTACHMENT

A very well built, angular drive unit with a 2 to 1 speed reduction. The drive spindle fits into the chuck of any ¼-inch Electric Drill, multiplying its usefulness many times by converting it into an efficient buffer, polisher or sander. It will polish cars, furniture and metal ware; sand and clean floors, woodwork, metal surfaces, etc., and do a surprisingly good job.

The angle of drive is 100 , slightly more than a right angle to give drill and cord clearance. A reversible or removable side handle is provided for easy control.

The 5-inch pad is made of rubber and flexes readily to get the best results on irregular surfaces. A high-grade, standard 5-inch lamb's wool bonnet is regular equipment which also includes two 5-inch sanding discs.

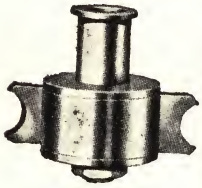
PRECISION BUILT WORKSHOP TOOLS

For All Makes of Drill Presses

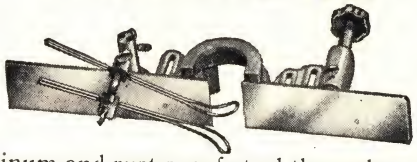
SAFETY SHAPER AND MOLDING CUTTERS



Blades mechanically held in position by notches—not pressure. Automatic alignment always insured. No set screws to loosen. No blades to fly out. Solid and split blade designs insure endless varieties of molding contours. Hi-speed tool cutters, full; 1″ width, solid and split blade designs. Available in six adapter sizes to fit all drill press spindles and small shapers.

Complete with three sets of standard cutters ...$

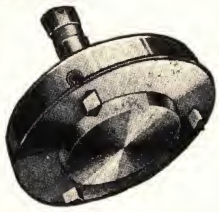
ALL METAL SHAPER FENCE



Aluminum and rust proof steel throughout. Attaches to standard makes of drill presses and shapers. Right hand face plate and bracket has "in and out" adjustment. Will accommodate Barron Drum Sander, Planer. A "must" with the Barron Molding Cutter or other shaper cutter tools.

Complete as illustrated .....$

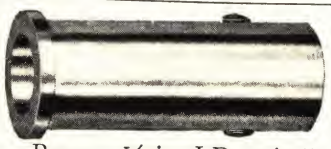
FAMOUS BARRON MULTI-PURPOSE WOOD PLANER



Planes, Panels, Surface Trues, Tenons, Rabbets, Beads, Routs

Over 100,000 now in use by homecraftsmen, cabinet and pattern makers, carpenters, boat and trailer builders, etc. Balanced. Vibrationless. For use in drill presses and portable hand routing machines.

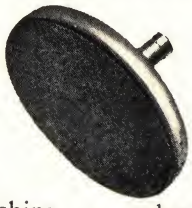
Complete .....$



Barron ½ in. I.D. spindle adapters. In 33 taper, 2-A taper, ½-20 and ½-24 threaded ends and in ½ in. and ⅝ in. I.D. ends for motor shafts.

Each .....$ and $

BARRON ROTARY SURFACE SANDER



Provides full 4 in. diam. sander, having ¼ in. or ½ in. arbors to fit portable drills, drill presses, flexible shafts. For surface sanding woods and plastics. Ideal for dead-true surface finishing — velvet smooth finish. Discs cannot slip or fly off.

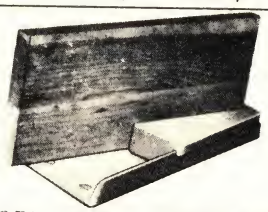
Complete with 20 Discs ...Each $

3" LONG DRUM SANDERS

New, improved, with expanding compression cups to insure immediate removal and replacement of sander sleeves. Available with both ¼ and ½ in. straight shank to fit all drill press chucks. Attractively packaged for display purposes with 5 sander sleeves.

1 in. Diam.—With 5 sleeves ....$

2½ in. Diam.—With 5 sleeves ....



WORK BENCH SPEED VISE

Two piece cast aluminum bench vise—unsurpassed for holding wood, plastics, and metals—rigid, firm, and fast. Handiest, and easiest-to-use vise ever designed for planing, sawing, filling, sanding, drilling, etc. Won't mar, mark, dent, or score. Ideal for carpenters, mechanics, pattern and tool makers—a "must" in every home workshop. Handles work-pieces paperthin up to 3½" wide, 8-10 feet long.

HI-SPEED TOOL STEEL SPIRAL FLUTE ROUTER AND ROUTER END MORTISING BITS

Ground from solid bar hi-speed tool steel. For smooth, fast routing and mortising, veining, carving and grooving. In graduated sizes from ⅛ in. to ½ in. or in sets of six as illustrated.

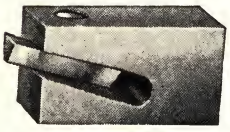
Per Set .....$

½" DOVETAIL CUTTER

Three flute standard dovetail cutter design with ½ in. hardened ground shank. Ideal for cutting male and female dovetails and dovetail grooving.

Each .....$

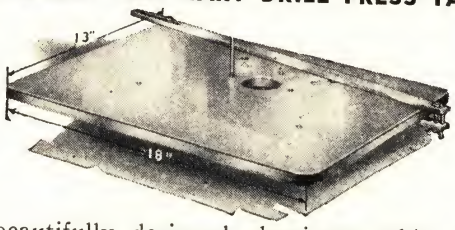
PLANER BLADE HOLDER



Die cast metal fixture holds Planer Blades at correct angle for fast, accurate edge sharpening.

Each .....$

ALL METAL AUXILIARY DRILL PRESS TABLE



A beautifully designed aluminum table, heavily ribbed on under side. Provides extra large working surface on any drill press. Recommended for Barron Planer, Sander, Router Bit and Molding Cutter operations. Blanchard ground top and bottom for absolute accuracy. Proof against warpage. Complete as illustrated with Barron steel clamping fence, etc.

Each .....$

Write for free instruction booklet on how to use these famous Barron tools.

English Antique Finish

PLEASE NOTE

Because of the serious shortage of Brass and the restrictions imposed on its use for non-Defense purposes, we may at times be out of certain numbers of Brass Hardware. Wherever please specify second and third choice on these items.
